

Real Estate Dept Intern

General – We seek a student who is interested in pursuing an education and career working in natural resources. The candidate could be pursuing a degree in a variety of majors, including but not limited to: environmental science, ecology, forestry, wildlife and fisheries management, biology, zoology, animal sciences, botany, agronomy; agriculture, natural resources and conservation. Candidates for the position should be prepared to primarily work outdoors during summer conditions. This includes heat, humidity, and insects.

Activities – The intern will be working on natural resources, forestry, invasive species, recreation, and real estate projects. Natural resources activities including working with the Flood ALERT system, helping with dam safety data collection, as well as preparation work for our deer hunt in the office and in the field. Forestry activities include collecting data in the field, checking timber sales and firewood lots, shearing Christmas trees, and marking trees for harvest under the direction of the Forester. Invasive species management includes hand-pulling plants, using hand tools, identifying plants, collecting data on invasive plant distribution, and other management activities under the direction of the Invasive Species Management Technician. Recreation activities include trail maintenance and assisting with recreation programs for kids. Real Estate activities include boundary maintenance/marketing and checking on the status of numerous matters including encroachments. On days with inclement weather, office duties will include working with GIS, filing real estate records in the vault, searching town land records, and other office work.
