

Yale Information Technology is currently accepting applications for the following positions:

**Yale Information Technology Early Career Development Associate** (For recent graduates or soon to be graduates (degree must be granted prior to July 1, 2022))

The Wolson Career Development Program offers participants opportunities to have a direct impact on technology at Yale by contributing to development and support of Yale's IT services. Learn about technology trends in higher education and gain new skills while working on IT projects in partnership with staff, faculty, and students.

The 18-month program consists of three rotations in areas within Yale IT that align with your career interests. During the program, you will have access to training and professional development workshops, classes, and resources, and will be mentored by an IT professional. Because the program emphasizes collaboration with the campus community, applicants should be organized and have excellent oral and written communication skills. The ability to work collaboratively with diverse groups is essential, as is an enthusiasm for exploring how technology can support teaching and learning. Knowledge of programming is desirable for development roles. This is a salaried position with full benefits. For more information and to apply, visit: [Wolson Rotational Career Development Program | It's Your Yale](#)

#### **Yale Information Technology Summer College Internships**

Open to rising sophomores, juniors, and seniors, the Yale IT Summer Internship Program places college students into various IT roles. For more information, visit: [ITS Summer College Internship Program | It's Your Yale](#)
